

Date: 12 March 2026**Recommendation Letter**

I am pleased to commend Rebecca Ling for her contributions as UX Designer on the ePlanner platform at the Urban Redevelopment Authority (URA). From June 2025 to February 2026, she was assigned as an external consultant (Accenture Song) to complement the in-house URA Product team.

The ePlanner platform is a multi-page web-based geospatial platform for Government's planning and design needs. Rebecca led UX design across complex issues that improved productivity, collaboration, and integration of modelling tools – helping the design of the platform, for example, from a single page to multipage application with user access control interfaces serving upward of 40 government agencies. Her quick grasp of planning and design intricacies allowed her to balance suggesting enhancements whilst mainstreaming complex tools for regular use.

She introduced structured user research practices, running a usability study with nine users and supporting enhancement of established planning workflow processes, including the Government Land Sales programme, with six cross-departmental stakeholders. Her findings directly influenced the product roadmap and secured management buy-in for embedded user testing.

Rebecca led a comprehensive overhaul of ePlanner's Design Language System, auditing and documenting over 90 components with clear usage guidelines adopted across design and engineering. She introduced a Figma organisational system that standardised file management and formalised a User Testing framework the team continues using.

She works effectively across product, engineering, and internal URA teams, presenting research findings to management and producing iterative outputs used in stakeholder demos. Her ability to handle multiple workstreams autonomously whilst maintaining high quality despite fast-paced development cycles reflects a proactive approach. Rebecca Ling has been a valuable contributor to the URA ePlanner workstream.

Yours Faithfully

CHING TUAN YEE

DIRECTOR (DESIGN & PLANNING LAB)
